

# R-Ladies Freiburg

Even in 2020, **women and gender minorities are vastly underrepresented in data science** and technology careers.

This is despite the fact that women make up **more than 50%** of undergraduate and graduate programs in most countries.

**R-Ladies is a worldwide initiative to promote gender diversity in one of the most widely-used statistical programming languages: R!**

R is a **powerful, dynamic, open-source language** that is **completely free** for everyone to use.

It is used by students, researchers, and professionals from the public and private sectors for all types of data science tasks.

Here are some examples of what you can do in R:

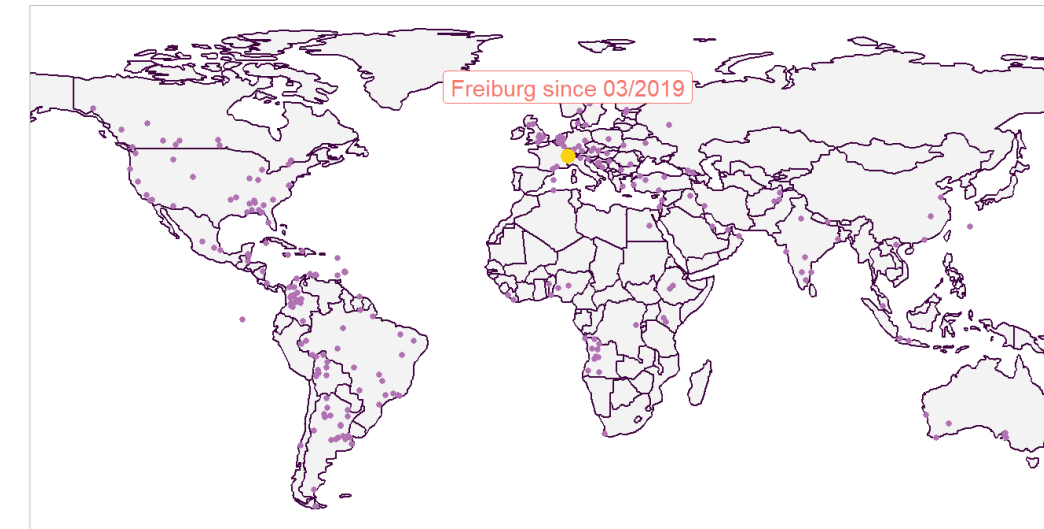

data communication  
interactive web apps  
reproducible science  
analysis data wrangling  
histogram time series  
web scraping  
deep learning  
teaching data results ggplot  
boxplot graphs statistics  
design tidyverse modeling  
p-value wordcloud  
distant reading  
decision trees

**Your local R-Ladies Freiburg chapter always welcomes new members!**

We meet once per month (on the first Wednesday, at 6 p.m.), every month, with a new topic presented by one of our members.

We'd love to have you join –  
**newbies and pros alike!**

R-Ladies chapters around the world

Check our Meetup page for our next meeting (the first Wednesday of every month):  
<https://www.meetup.com/rladies-freiburg/>  
or follow the QR code.

**All genders and levels are welcome**  
and encouraged to join!  
Feel free to contact us with any questions.
