Women* in data science
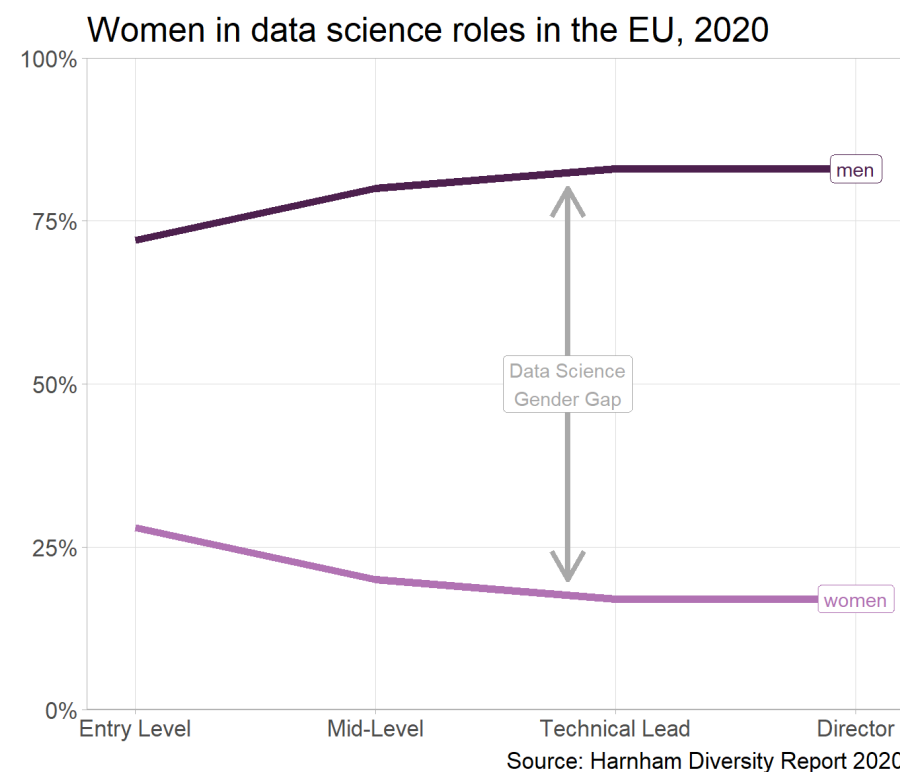

Even in 2020, **women and gender minorities are vastly underrepresented in data science and technology careers**.

Women in data science roles in the EU, 2020

R-Ladies global:

- aims to achieve proportionate representation

- by encouraging genders currently underrepresented

- in one of the most widely-used statistical programming languages: R!

learn more in **rladies.org**

Why use R?

R is a language for **statistical computing** and **data visualisation** which is

- completely **free**

- already the **standard** for statistical analyses

- **powerful** and **flexible**

- **open-source** and **well-supported**

Are you wondering what you can do with R? Here some examples:

Join R-Ladies Freiburg!

Your local chapter always welcomes new members!

R-Ladies chapters around the world

We meet

- in workshops to discuss one specific topic

- to do parallel coding

- or sometimes just to have fun

in a safe environment where we can all learn and exchange.

Are you a **complete beginner** or a **total profi**? You are welcome to learn and share your expertise!
